Ayşe Tuba Altuğ, DDS, PhD

Professor Ankara University, School of Dentistry Department of Orthodontics

Dr. Ayşe Tuba Altuğ graduated from University of Ankara, School of Dentistry in 1995 and she is still a faculty member at the same university's Orthodontics Department.

Në vitin 2001 ajo u diplomua ne programin pasuniversitar të kërkimit shkencor në Ortodonci Kirurgjikale në Institutin e Kirurgjisë plastike rikonstruktive të Qendrës Mjekësore të Universitetit të New Yorkut. Fokusi i saj klinik dhe kërkimor janë kleftet e buzës dhe palatumit, anomalitë gjenetike kranio-faciale, sindromat kokë-qafë dhe kirurgjia ortognatike.

She was the President of the Turkish Orthodontic Society between 2018-April 2021. She is married and has two children.

Topic of lecture:

IMPROVING THE QUALITY OF LIFE WITH ORTHODONTIC APPROACHES IN CHILDREN WITH SPECIAL NEEDS

Although orthodontics is perceived as the cosmetic branch of dentistry, the aim of our treatment approaches is not always to achieve a beautiful smile.

Most of our patients also have craniofacial discrepancies and functional problems related to breathing and speech. In addition, orthodontics departments provide high-quality dental and aesthetic health care for children and young adults with special needs.

The purpose of this presentation is to share our experiences on improving the quality of life with orthodontic treatments of young individuals with special needs such as cleft lip and palate, cerebral palsy, muscular dystrophy and Down syndrome.

October 6, 2022 - Thursday
Auditori 2
