Observatory and telescope:	
30-cm Maksutov telescope of the Ankara University Observatory	

Detector:	OPTEC SSP-5A photoelectric photometer (uncooled) containing a side-on R1414 Hamamatsu photomultiplier.
------------------	---

Method of data reduction:	
Reduction of the observations were made in the usual way (Hardie, 1962).	

Method of minimum determination:	
The minima times were calculated using Kwee & van Woerden's (1956) method.	

Times of minima:
